

Low Profile Bulk Bag Discharger

Bulk Bag Discharge

- ◆ Rugged sanitary stainless steel frame construction, optional mild steel, epoxy coated
- ◆ Polished stainless product contact hopper with vibrating screen
- ◆ 10-20 cubic foot surge capacity
- ◆ Accommodates vacuum convey and VACUCAM® Ejector Mixer slurry applications
- ◆ C.I.P design for ease of cleaning
- ◆ Direct connect to Air-Cone® Hopper or Pickup to properly condition powder
- ◆ Load cell option for loss in weight batching
- ◆ Quick Connect™ sanitary dust free bag spout capture

The Low Profile Bulk Bag Discharger with integral hopper was developed by Semi-Bulk Systems to address the phenomenal powder conveying capabilities of the VACUCAM® Ejector Mixer. The low profile design accommodates retrofit installations with low ceiling heights – the bulk bag is placed into the frame at floor level and lifted into the hopper.

Designed to meet all functional requirements of the VACUCAM® Ejector Mixer such as proper powder conditioning for stable feed rate, loss-in-weight accuracy, quick unloading and dust free operations.
